Billing Code	Appropriate Modifiers	Service Provided	Billing Increments	Client Status	Description / Activities	Provider Levels Allowed
S5111	AH HO HN HP	Home Care Training, Family, <i>(ongoing caregiver training)</i> , 15 min	15 minutes	Client may or may not be present	Standard, but individualized, curriculum focused on the basics of ABA. Emphasizes skills training, which enables caregivers to become competent in implementing treatment protocols across settings and/or environments. Training usually occurs after an individualized behavioral assessment and treatment analysis or treatment recommendation formulation. Training can include general and individualized didactic presentations, modeling and demonstrations of the skills in a training setting, and practice with performance feedback for each specific skill. Ongoing parent training activities can involve supervision and coaching during implementation, refresher trainings, problem solving, and support in new environments. Training should promote generalization and maintenance of treatment.	BCaBA BCBA *CMHP BCBA-D
					* Child Mental Health Professional (Master's degree minimum) A qualified CMHP must provide services within the experience and competence of their license.	
					Definition (Provider)	Billing Modifier
